Thanks for looking into this Joyce. I just got word from Emily that the 3rd frac tank has been emptied and cleaned. It sounds like the rest of today and Monday will involve decontamination, demobilization, and shoring up any storm water related issues. I anticipate getting out to the site to Monday to confirm and document so I can submit the notice to you. Tobin – please correct me if I'm mistaken.

Thanks,
Patrick

Hi Tobin and Patrick- if I asked about the right facility, then it's a no go. I will look at the lab data again. If concentrations are below telp limits, is there a non-haz facility you know of?

Joyce

Joyce,

Based on the response from the state (see below), I would not recommend using this landfill in that it is in the assessment monitoring phase. Please let me know if there are others that you are considering.

Hey Linda, Phantom Landfill has groundwater contamination issues and is in assessment monitoring. Also, we have an open compliance order with the facility. They have completed most of the actions for the landfill but are in the process of completing a SEP.

Let me know if you need more information.

Thanks

Ed,

Could you please let me know if the Twin Enviro disposal facility in Penrose, Colorado is in compliance and has no uncontrolled groundwater releases? When we checked in December 2017, I believe there were groundwater releases at the site being evaluated by the state.

Thank you.

Hi Linda – could you check to see if the Twin Enviro disposal facility in Penrose, Colorado is on the approved list? The contractors think it might already be considered acceptable for CERCLA sites.

Thank you!

Joyce
